

EMPOWER YOUR TEAM TO DRIVE CHANGE

Environmental concerns, social responsibility, and ethical practices are no longer relegated to the sidelines. Instead, they have emerged as key drivers of innovation, competitive advantage, and long-term success. In today's interconnected world, consumers, investors, and employees alike are demanding more from the organizations they support, urging them to take responsibility for their environmental footprint, social impact, and ethical practices.

By providing your team with comprehensive sustainability training, you empower them to become change agents within your organization. Our courses go beyond mere theoretical knowledge; they delve into practical strategies and actionable insights that can be implemented across departments and levels. From understanding the principles of sustainable development to integrating sustainability into daily operations, our training equips your staff to identify opportunities for positive change, drive efficiency, and foster innovation.

COURSES IN THE SUITE INCLUDE:

BUSINESS SUSTAINABILITY

Makes the case for the importance of business sustainability practices:

- How businesses can help drive global change
- How climate change works
- What you can do to promote sustainable practices at work and at home

Provides a working knowledge and understanding of the mechanics of climate change:

- The science behind climate change
- International efforts to fight climate change
- How to reduce your personal carbon footprint

RECYCLING FOOD & ORGANIC WASTE

Explains the importance of recycling and composting food waste:

- The difference between home composting and food and garden waste collection
- What types of items are compostable
- Common misconceptions about food waste disposal

NON-RECYCLABLE WASTE

Clarifies widespread confusion about recycling habits that cause more harm than good:

- Which items should be tossed in the bin instead of recycled
- How improperly recycled items harm recycling efforts
- How recycling requirements may vary between different neighbourhoods

POLLUTION

Covers different types of pollution and the human activities that cause them:

- Major causes of pollution
- The effects of pollution on ecosystems, human health, and climate change

WATER & ENERGY EFFICIENCY

Presents a plan for improving business sustainability by reducing consumption and lowering costs:

- How improving efficiency benefits our business
- How to use energy and water more efficiently
- The easiest wins for quick improvements

ECO-DRIVING

Teaches a method of driving that minimises fuel consumption and environmental impact:

- The financial and environmental benefits of eco-driving
- How to do eco-driving
- Other ways that businesses can optimise travel

WORKING TOWARDS ZERO WASTE

Presents a practical plan to reduce waste at work and at home:

- The importance of preventing and reducing waste
- Why it is important to understand the hierarchy of waste
- How to work towards a zero-waste lifestyle

ESG FUNDAMENTALS

Presents an overview of ESG and what it means for businesses

- This course covers what ESG is, how it works, and what staff can do to be part of it

Save time, stay compliant, trust Barbour.
